PROFESSIONAL SUMMARY

Senior full-stack engineer with 7+ years shipping production software across the entire stack — backend services, responsive frontends, infrastructure, and data pipelines. Proven record of owning problems end to end, from ideation through shipped, reliable solutions. Deep experience in strongly-typed backend systems, API design, event-driven architecture, and modern web frontends. Adapts quickly to new stacks and tools, with working fluency in Python, JavaScript, SQL, and Linux infrastructure. Actively uses AI tooling to accelerate delivery while maintaining ownership of quality and maintainability. Experienced with monitoring.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, SQL / PostgreSQL, HTML / CSS, Bash

Frameworks: .NET / ASP.NET Core, Blazor, Node.js, Entity Framework, FastAPI

Infrastructure & Tools: Docker, Nginx, Linux, Git, Azure, CI/CD, Redis, Kubernetes, gRPC

Concepts: Full-Stack Development, API Design & REST, Event-Driven Architecture, Web Performance Optimization, Automated Testing, AI-Augmented Development, Distributed Systems, Internal Tooling, Data Pipelines, Web Scraping

EXPERIENCE

Foxen *Columbus, OH Senior Software Engineer* *Aug 2023 — Present*

- Own full-stack feature delivery end to end: requirements, design, implementation, testing, deployment, and monitoring
- Reduced frontend API call hops from 4 to 1 via reverse proxy layer, cutting endpoint latency up to 15x for B2B clients
- Created reusable UI component libraries and automated testing frameworks adopted across every service
- Drove client SDK standardization enabling code reuse and consistent developer experience across 10 services
- Implemented event-driven architecture inside a legacy codebase without service disruption
- Built gRPC service interfaces for internal microservice communication with schema versioning

Impower.ai *Columbus, OH Automation Architect / RPA Developer* *Mar 2020 — Aug 2023*

- Designed container tracking system integrating scraping, APIs, and automated pipelines — enabling 5-10x daily inspection frequency and reducing demurrage fees for a logistics client
- Worked as the sole engineer embedded with client stakeholders — requirements, demos, and iteration in days-long feedback loops, then shipped to production
- Built full-stack web dashboards and data processing pipelines for compliance, logistics, and lead generation
- Developed lead-generation system processing thousands of prospects daily for a law firm
- Rotated through client engagements including on-site Process Automation Engineer at Chipotle Mexican Grill
- Delivered compliance automation for Fortune 500 company directly with stakeholders, avoiding significant litigation exposure
- Delivered enterprise automation that eliminated 10 planned new hires for a client engagement — owned from discovery through deployment

PROJECTS

Talaria (Voice-Controlled Android App) *Android / Compose, Python / FastAPI, Docker, Kubernetes*

- Designed and built real-time voice transcription Android app with FastAPI speech-to-text backend
- Implemented Edge TTS synthesis for voice response generation
- Deployed with Docker containers and Cloudflare Tunnel for secure public access

Hermes Agent (AI Development Tooling) *Python, TypeScript, LLMs, Docker, Agent Systems*

- Developed CI/CD pipelines and Linux containerized deployment infrastructure
- Contributor to open-source autonomous AI agent framework used by thousands
- Built agent orchestration systems with multi-tool execution and subagent delegation

ffilt.us (Personal Blog & Portfolio) *Python, MkDocs, Azure, GitHub Actions*

- Custom Material theme with retro BBS aesthetic and interactive resume flow
- Automated CI/CD deployment with GitHub Actions
- Content-hash asset cache-busting pipeline for static site performance

EDUCATION

Ohio State University *2014 — 2018 B.S. Chemical Engineering* *Columbus, OH*
